

REHMAN SHARIFF

Final-Year BE Student | Interested in Software Engineering Roles

+919036069732

doddaballapur, bangalore rural district

rehmanshariff996@gmail.com

ABOUT ME

Motivated BE student with a strong foundation in backend and web development. Skilled in Python, JavaScript, Node.js, and database management. Eager to apply my knowledge in real-world projects and grow as a professional developer.

EDUCATION

KNS INSTITUTE OF TECHNOLOGY
BE in AI&ML – CSE
2022 – 2026
CGPA : 6.8/10

VIDHYANIDHI P U COLLEGE
PCMC
2019 – 2021
PERCENTAGE : 61%

GK HIGH SCHOOL
2019 PASSOUT
PERCENTAGE : 60%

SKILLS

- JavaScript
- Python
- MySQL
- React.JS
- GIT/GITHUB
- MACHINE LEARNING
- MICROSOFT AZURE
- MS WORD
- MS EXCEL

HOBBIES

- Programming & Learning New Technologies
- Reading & Research
- Gaming / Exploring
- Travelling

PROJECTS / EXPERIENCE

DEEPFAKE DETECTION SYSTEM

A Deepfake Detection System is designed to identify and prevent the misuse of AI-generated fake media. It uses Machine Learning and Deep Learning models to detect manipulated or synthetic content across multiple formats:

- Image Detection: Used XceptionNet CNN to analyze facial features and detect manipulations.
- Audio Detection: Implemented a CNN-LSTM hybrid model with MFCC features to detect cloned voices.
- Video Detection: Applied ResNet + BiLSTM for temporal frame analysis to spot unnatural facial movements.
- Technologies: Python, TensorFlow/PyTorch, OpenCV, Librosa, FaceForensics++ dataset.
- It's my final-year project.
- It's under process but already planned and structured.
- You have a clear completion timeline (Nov 2025).

Fake News Detection System

- Developed a system to detect false news articles using Machine Learning and Natural Language Processing (NLP).
- Technologies: Python, Scikit-learn, Pandas, NLTK, Flask (for web interface).
- Outcome: Achieved high accuracy in classifying news articles and created a simple web interface for testing.

Criminal's Data Management System

- Developed a system to manage criminal records using Python and MySQL.
- GUI Interface: Built with Tkinter for easy data entry, search, and management.
- Database: Designed MySQL database to store and retrieve criminal records efficiently.
- Technologies: Python, MySQL, Tkinter.
- github link : <https://github.com/AbdulRehmanShariff/criminal-data-management>

ACHIEVEMENT

- Microsoft Azure Fundamentals Certificate Completed Microsoft Azure Fundamentals course
- Microsoft Azure Administrator & Design and Implementation Certificate – Gained practical skills in managing Azure cloud services.
- Selected for a 3-month Artificial Intelligence Internship at SkillX, trained in ML, data preprocessing, and model evaluation.
- Foundations of Data Science Certificate Completed from Pinnacle Labs.
